## TECHNICAL SKILLS

**Programming** | Python - JavaScript - SQL - CSS - HTML

**System Design** | Microservices - Domain-Driven Design - Message Passing - Event Sourcing

**Back-End** | PostgreSQL - Django - FastAPI - RabbitMQ - MySQL

**Front-End** | React - DOM Manipulation - React Hooks - Redux Toolkit

**Front-End Design** | TailwindCSS - Bootstrap - Bulma - MaterialUI

## APPLICATION DEVELOPMENT EXPERIENCE

**Lead Developer** | *Lost Soles* | React, FastAPI, Redux Toolkit, TailwindCSS April 2023

- Orchestrated the design of a greenfield project from start to MVP completion including wireframe design, RESTful API design and documentation creation.
- Coordinated with 4 developers to create a dynamic React+Redux front-end with a complex FastAPI back-end to allow for scalability and longevity.
- Spearheaded the front-end design using Tailwind CSS to create an easy-to-use UI, and implemented custom-designed dropdown menus to improve the overall visual consistency of the site and enhance the user experience.

**Lead Developer** | *Jadelovebott.art* | React, TailwindCSS June 2023

- Collaborated with an artist to develop and deploy a SPA using React for a seamless and dynamic user experience that aligned with the artist's style and showcased 7 bodies of work.
- Utilized TailwindCSS to fulfill the artist's vision for a modern and maximalist design by utilizing a combination of grids and flexboxes to create a customized layout.

**Full-Stack Developer** | *CarCar* | React, Django, Bootstrap, Polling, Docker Mach 2023

- Connected 4 microservices using polling to allow for future scalability.
- Developed a comprehensive Django backend with 8 endpoints, JSON Serializers, and HTTP responses in order to implement CRUD functionality.
- Implemented web app front-end with Bootstrap Library and ReactJS, including dynamic row highlighting to allow for more efficient viewing of upcoming appointments.

## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEERING IMMERSIVE RESIDENT (SEIR)** | Galvanize | Remote 2023

- Conducted daily code review of 11 greenfield projects to improve code quality, efficiency and scalability of student projects.
- Lead the implementation of a "student detail view" page using Django and custom Django tags to allow for staff to view 1000+ student's information across 50+ cohorts seamlessly.
- Mentored 50+ junior software engineers to supplement their understanding of the curricula, solve over 200 bugs, and worked collaboratively to improve their code.

**DIRECTOR** | Tualatin Hills Parks & Recreation District | Beaverton, Oregon 2019-2020

- Communicated with patrons and staff through email, phone, and face-to-face interactions.
- Directed a staff of 20+ and managed the day-to-day activities of a summer camp.
- Designed protocols that were implemented center wide to improve camper safety by 400%.

## EDUCATION

**Hack Reactor** | Advanced Software Engineering Certificate

May 2023

**Western Oregon University** | B.A. Education

June 2022
